

**Revit Technician – Axiom Structures Limited**

Job Type: Permanent

Axiom Structures are looking for a Revit Technician with approximately 1-2 years' experience of a similar role using Revit, for our busy office and extensive client list. We have a varied and interesting workload ranging from bespoke domestic projects to multi-storey commercial schemes nationwide.

We have earned an excellent reputation over the past years of developing economic and creative structural and civil engineering designs, and now have several respected clients running high-value projects.

A successful candidate will:

- Carry out structural information modelling and drawing production on projects at all design stages, using Autodesk Revit
- Further develop skills in Revit, working closely with experienced Revit Technicians & Engineers
- Gain experience in liaising with external Design Team members such as Architects and MEP Engineers
- Overall develop much needed and desirable skills within the construction industry

Desirable skills:

- Working knowledge of Autodesk Revit and 3D modeling
- Ability and demonstrated experience of producing 2D structural drawing sheets based on design information in a 3D BIM model across all design stages.
- Experience in working on projects with all the main structural materials
- Ability to take initiative in response to direction or instruction
- Ability to present details for discussion
- Results-driven, resourceful, self-motivated and willing to take responsibility
- Good interpersonal skills, good written and verbal communication skills
- Ability to work well under pressure and meet deadlines effectively
- You will be required to work well as part of a close knit structural team

For the role we are offering;

- A competitive salary
- Payment of professional subscriptions

If you think you are the right candidate, please send your CV at [office@axiom-structures.co.uk](mailto:office@axiom-structures.co.uk)

The successful candidate must have eligibility to work in the UK.
